

Firefox

Scripte für Firefox

diese müssen ins Profil Verzeichnis in den Ordner „chrome“

<https://github.com/ardiman/userChrome.js/wiki/Skriptliste>

In der Adresszeile „about:config“ eingeben. Dort im Suchfeld „toolkit.legacyUserProfileCustomizations.stylesheets“ eingeben und mittels Doppelklick auf „true“ stellen, damit die userContent.css und userChrome.css wieder ausgewertet werden.

Default CSS Einstellungen kann man abrufen in dem man in der Browserzeile folgendes eingibt:

resource:gre-resources/html.css </WRAP> ===== CSS Definitionen =====

http://kb.mozillazine.org/Chrome_element_names_and_IDs

===== userChrome.css ===== Firefox z.B. gelbe Ordner mit eigener CSS Datei

Datei: userChrome.css

Verzeichnis:

C:\Users\conny\AppData\Roaming\Mozilla\Firefox\Profiles\y0gfb4ws.2019-10-15\chrome
