

1. create a directory `_views` in `datadir` (usually `data`) and copy your old visits file in there
2. create the file `inc/counter.php`

```
<?php
global $ID,$ACT;

$file=realpath($conf['datadir']).'/_views/'.$ID;

if (file_exists($file)) {
    $views=FALSE;
    while ($views===FALSE) {
        $views=file_get_contents($file);
        if ($views===FALSE) {
            usleep(50000);
        }
    }
    $views=$views+1;
} else {
    $views=1;
}

if (($ACT == 'show') && ($INFO['exists'])) {
    while(!$written) {
        $written=file_put_contents($file,$views);
        if (!$written) {
            usleep(50000);
        }
    }
}

$fn.=" ($views views) ";
```

3. add `include('counter.php');` in `inc/template.php` as below

```
function tpl_pageinfo(){
    global $conf;
    global $lang;
    global $INFO;
    global $REV;

    // prepare date and path
    $fn = $INFO['filepath'];
    if(!$conf['fullpath']){
        if($REV){
            $fn =
str_replace(realpath($conf['olddir']).DIRECTORY_SEPARATOR,'',$fn);
        }else{
            $fn =
str_replace(realpath($conf['datadir']).DIRECTORY_SEPARATOR,'',$fn);
        }
    }
}
```

```
}  
$fn = utf8_decodeFN($fn);  
$date = date($conf['dformat'],$INFO['lastmod']);  
  
include('counter.php');
```
