

Fotoalbum

File einfach in ein Verzeichnis mit den Bildern.

Die ersten Zeilen des Programms auf die Bedürfnisse anpassen. Fertig - have fun.

[nanoalbum.php](#)

```
<?php
/*
 * NanoAlbum is a simple and small PHP photo album /gallery
 * Goals:
 * KISS - keep it small and simple
 * no database required
 * zero configuration / little configuration
 * small footprint: basic functionality in just one single file
 * no wasting of display area, use whole screen
 * design for modern browsers , html5, css3
 * responsive design for mobile devices
 * save bandwidth, using Client cache where possible
 * provide original photos for download and viewing
 * Licensed under the MIT license:
 * http://www.opensource.org/licenses/mit-license.php
 * installation: https://github.com/oliworx/NanoAlbum/wiki/install
 * demo: http://kurmis.com/
 * 11.05.2015 - some modifications 2015 by Conny Henn (www.Hennweb.de)

  // Plug-and-Play fastimagecopyresampled function replaces much
  // slower imagecopyresampled.
  // Just include this function and change all "imagecopyresampled"
  // references to "fastimagecopyresampled".
  // Typically from 30 to 60 times faster when reducing high
  // resolution images down to thumbnail size using the default quality
  // setting.
  // Author: Tim Eckel - Date: 09/07/07 - Version: 1.1 - Project:
  // FreeRingers.net - Freely distributable - These comments must remain.
  //
  // Optional "quality" parameter (defaults is 3). Fractional values
  // are allowed, for example 1.5. Must be greater than zero.
  // Between 0 and 1 = Fast, but mosaic results, closer to 0
  // increases the mosaic effect.
  // 1 = Up to 350 times faster. Poor results, looks very similar to
  // imagecopyresized.
  // 2 = Up to 95 times faster. Images appear a little sharp, some
  // prefer this over a quality of 3.
  // 3 = Up to 60 times faster. Will give high quality smooth
  // results very close to imagecopyresampled, just faster.
  // 4 = Up to 25 times faster. Almost identical to
  // imagecopyresampled for most images.
  // 5 = No speedup. Just uses imagecopyresampled, no advantage over
  // imagecopyresampled.
