

UNZIPPER

Packt oder Entpackt Dateien.

Status: No .zip or .gz or rar files found. So only zipping functionality available.
Processing Time: 0.00015997886657715 seconds

Archive Unzipper

Select .zip or .rar archive or .gz file you want to extract:

Extraction path (optional):

Enter extraction path without leading or trailing slashes (e.g. "mypath"). If left empty current directory will be used.

Unzip Archive

Archive Zipper

Path that should be zipped (optional):

Enter path to be zipped without leading or trailing slashes (e.g. "zippath"). If left empty current directory will be used.

Zip Archive

Unzipper version: 0.1.0

[unzipper.php](#)

```
<?php
/**
 * The Unzipper extracts .zip or .rar archives and .gz files on
 * web servers.
 * It's handy if you do not have shell access. E.g. if you want to
 * upload a lot
 * of files (php framework or image collection) as an archive to save
 * time.
 * As of version 0.1.0 it also supports creating archives.
 *
 * @author Andreas Tasch, at[tec], attec.at
 * @license GNU GPL v3
 * @package attec.toolbox
 * @version 0.1.0
